Clock starts

Specialist Assessment

cialist Referral Triage.

ification and expansion of primary essment history +/-examination where ded.

ight to diagnostic test or face to face essment

Metric

3.6 Escalation thresholds and decision aids

3.7 Red Flags

Shock & dysrhythmia

4.0 Subspecialist Assessment

Specialist Referral Triage.

Clarification and expansion of specialist assessment history +/-examination where needed.

Straight to diagnostic test or face to face assessment

3.1 Diagnostic thresholds and decision aids

4.1 Diagnostic thresholds and decision aids

gnostics (Dx)

3.2.2 Echo

Transoesopha or Stress Echo

Echo for dysynchrony

3.2.3 Nuclear Imaging

3.2.4 Coronary Angiography

Assessment for ischaemic heart disease

4.2 Diagnostics (Dx)

4.2.1 No diagnostic required

4.2.2 Imaging

Angiography may be indicated to diagnose underlying ischemia

4.2.3 Pathology

4.2.4 Physiological measurement

3.3 Treatment thresholds and decision aids

4.3 Treatment thresholds and decision aids

reatments (Tx)

Active toring

nacologic on

3.4.3 Physical, psychologica and social care

Rehabilitation

3.4.4 Medication

Medication, oxygen therapy

3.4.5 Preoperative Assessment

3.4.6 Invasive treatment

Biventricular pacing/ICD

4.4 Definitive Treatments (Tx)

4.4.1 Reassurance information and self help

4.4.2 Active monitoring

4.4.3 Physical, psychologica and social care

4.4.4 Medication

4.4.5 Preoperative Assessment

4.4.6 Invasive treatment

Revascularisation, Resynchronisation, ICDs, acceptance for Transplant, LVAD, CRT/D

and Review

Outcome Measurement

4.6 Rehabilitation and Review

Quality of Life (QoL) Outcome Measurement
